March 4/72

Dear W9YT-

I have enclosed a "reception report" of your ham station. I have also enclosed return postage - 1 IRC. Could you please verify this with a QSL card.

I heard your station in contact with OH2BM on March 4/72 at 1920 GMT or 220 pm EST or 120 pm CST. Your frequency was 14,200 khz in the 20 meter band. Your signals RST was - 3X5. There was light QRM and very little QRN. The language was English.

My receiver is a National NC-46 10 tube Superhet covering 535 khz to 30 MHz in 4 bands. It is a communications type receiver.

My antenna is a grounded vertical mounted on the roof of my house up about 25 feet.

I also use a pair of 8 ohm headphones from Allied Radio Stack.

I like to DX states and provinces and my records so far is 9 provinces and 31 states verified.

Yours Truly-

Michael Wiseberg
